

Course Outline

Course Code : MKT3714B
Course Title : Digital Marketing
Semester : Semester 1, AY 2023/2024
Faculty : Ms Wu Mengyu
Department : Marketing
Email :
URL : <https://bschool.nus.edu.sg/marketing/faculty/>

COURSE DESCRIPTION

This module will introduce students to fundamental concepts in digital marketing and E-commerce. Students should be able to gain a solid understanding of the current landscapes, topics, strategies and their impact on businesses. The course should also provide students with the tools and frameworks to apply digital marketing and e-commerce strategies effectively in your future employment or ventures.

COURSE OBJECTIVES

The course has the following overarching objectives:

- To understand the current digital marketing landscape and provide you with the tools that marketers use in day-to-day marketing planning and execution
- To develop skills in defining marketing problems, analyzing alternatives, identifying opportunities, and interpreting their implications through hands-on exercises.
- To gain confidence to tackle real-life marketing problems in a increasingly digital world

METHOD OF EVALUATION

Assignment	Type	Proportion of Grade
(1) Class Participation	Individual	25%
(2) Individual Assignment	Individual	30%
(3) Group Project	Group	35%
(4) Group Project - presentation	Individual	10%

(1) Class Participation

A portion of class time will be devoted to discussion and application of course concepts, which constitutes 25% of the total course grade. Class discussions are effective means of sharpening your critical thinking abilities. The discussion format provides an opportunity to argue your position and to learn from others by listening to their comments, analysis, and criticism.

Several criteria are considered when evaluating your class participation.

- Quality of the class participation. Sheer quantity is neither sufficient nor necessarily desirable.
- High quality class participation is thoughtful and includes comments that add to our understanding of a situation. It goes beyond mere repetition of case facts
- High quality class participation is supported with qualitative and/or quantitative analysis based on marketing theory and concepts.
- Your comments should take into account the comments and analyses of your classmates and be relevant to the topic under discussion. Participation should move discussion forward.
- You need to be present in class in order to receive a strong class participation score.

(2) Individual Assignment

The individual assignment aims to test your understanding of the concepts discussed during the course and is worth 30% of your grade. The individual assignment topic and requirements will be released before Week 5 and will be due on Week 7. Late submissions will be penalized heavily, so you are expected to submit the assignment timely.

(3) Group Project

To ground theory with practice, students will work on a group project in teams of five, where you will be tasked to research about and create a digital marketing campaign for a real brand. More details for the group project would be shared during the first week of class. You will be expected to submit a group report as well as complete a final group presentation in week 11/12. All students are expected to present and a 5-10 min Q&A section will be provided for non-presenting students to actively participate in the discussion.

(4) Group Project - presentation

During the presentation, your presentation skills will be accessed individually and will contribute 10% to your grade. Active participation (as both a presenter and as a non-presenter) during the Q&A section at the end of each presentation will also contribute to this score.

COURSE MATERIALS

Required textbook:

- N/A

Academic Honesty & Plagiarism

Academic integrity and honesty is essential for the pursuit and acquisition of knowledge. The University and School expect every student to uphold academic integrity & honesty at all times. Academic dishonesty is any misrepresentation with the intent to deceive, or failure to acknowledge the source, or falsification of information, or inaccuracy of statements, or cheating at examinations/tests, or inappropriate use of resources.

Plagiarism is “the practice of taking someone else’s work or ideas and passing them off as one’ own” (The New Oxford Dictionary of English). The University and School will not condone plagiarism. Students should adopt this rule - You have the obligation to make clear to the assessor which is your own work, and which is the work of others. Otherwise, your assessor is entitled to assume that everything being presented for assessment is being presented as entirely your own work. This is a minimum standard. In case of any doubt, you should consult your instructor.
